Introduction.

In presenting this, our directory of the City of Alton and suburbs for the years 1895-6, we desire to extend our sincere thanks to its patrons and friends for favors extended and for the liberal patronage without which its publication could only be made at a loss.

We have made an earnest endeavor, and have not spared labor or expense to make it a work as nearly perfect as possible. Unavoidable delays will occur in a work of the magnitude of this and inaccuracies, more or less important are bound to creep in on account of such delays. These have been remedied so far as possible by the errata. We trust our patrons will find this work as accurate, at least, as any work previously published.

There is not a little difficulty experienced by our canvassers in properly locating many people, because of failure to have their houses numbered. It would be of material advantage, not only to users of the directory, but to residents themselves, if they would see that the proper numbers are placed on the houses.

Conscious of an honest, earnest and persistent effort to give to the people of Alton and vicinity a directory as free from errors and as complete as the nature of the case will admit, believing we have been at least reasonably successful, and again thanking you for a liberal patronage, we beg to subscribe ourselves,

Yours Respectfully,

J. P. Hodge & Sons.

ALTON.

Sketch of the History Pertaining to the "Bluff City."

Its Business, Social, Educational and Commercial Advantages.

Site.

The City of Alton lies in Section 12 and fractional sections 10, 11, 13 and 14, in Fractional Township 5 north, range 10 west, and is situated on the banks of the Father of Waters, just at the point where the precipitous rocks that for many miles mark the Illinois shore fall away into the broad, fertile, alluvial plains known as the "Great American Bottoms."

As one would suppose, its topography is characterized by sharp ravines and prominent hills and knolls. It is seven miles above the confluence of the Missouri and Mississippi rivers, sixteen miles (as the crow flies) above St. Louis, and twenty miles below the mouth of the Illinois river. It is 257 miles southwest of Chicago. In front of the city of Alton and for a distance of some two miles, the Mississippi

river runs almost directly from West to East, and the streets are laid out parallel and at right angles therewith.

Historical.

The City of Alton, now spreading over several square miles of hill and valley, was in its conception quite miniature and the original town as surveyed and platted by Col. Rufus R. Easton, then of St. Louis, in 1837, extended along the river from Henry to Market and northward to Ninth street. The Christian name of Col. Easton's eldest son, Alton, was given the coming city, while those of three other children are preserved in connection with Alby, George and Langdon streets. Col. Easton's native modesty is signalized in the naming for himself one of the least promising streets in his plat, the second east of Market.

It may be a matter of some satisfaction to Altonians to remember that the son whose name our city proudly wears proved himself not unworthy the distinguished honor, having gained considerable lustre as a military leader in the Mexican war.

Col. Easton in 1818 erected on the site of the present M'Pike building at the corner of Second and Piasa streets a double hewed log house which answered the demands of the time for hotel accommodations. This building stood until 1868, when it was removed to make room for the more pretentious building that now occupies its site. The first framed house was erected the following year by Major Charles W. Hunter, whose enterprise in the way of real estate added much to the area of the city in Hunter's Addition, familiarly known as Hunterstown.

The growth of Col. Easton's new enterprise was not conspicuous at first, though his prominence and high per-

sonal character led to a settlement that promised well until serious litigation over the town site paralyzed real estate interests. A compromise agreement was reached between the litigants in 1830 and was followed by a boom of no small dimensions for that day, which placed the future city on its feet as no mean rival for its greater and more prosperous neighbor, St. Louis. The town of Alton was incorporated three years later and the growth was such that in 1837 it was credited with a population of 2500 souls. It was made a port of entry and large wholesale and retail houses did a prosperous business. A special charter was on July 21st of this year granted the City of Alton by the State Legislature. The first Mayor of the city was Hon. John M. Krum. In this year the financial crash which shook to its foundations the business structure of the entire country was exceedingly disastrous to Alton merchants, who could not boast the stability of the present generation, not more than one or two of who were found able to stem the tide and save their credit. In this year also occurred the famous pro-slavery riots in which eventually Elijah P. Lovejoy lost his life at the hands of an excited mob, bent on the destruction of his printing outfit and the suppression of his newspaper, which fearlessly defended the rights of the black man. It was therefore in the city of Alton that was sounded the first telling note leading to the great rebellion and the freedom of the four millions of serfs "whose unrequited toil" had long sought relief at the hands of a Christian world in vain. It would therefore seem eminently proper that the great State of Illinois should have decided to honor the ashes of the "first martyr to the anti-slavery sentiment in America" with a more beautiful and substantial memorial than the little slab that marks their resting place in the City Cemetery; wherefore the 39th General Assembly passed a bill appropriating the sum of $25,000 towards

the cost of a monument to his memory, to which sum large additions have been made by private subscriptions.

By the year 1842 business had so far revived and the business methods of her merchants had so much improved that after that date there was a continued and healthy growth.

Railway Facilities.

There are few cities of the size of Alton so well provided with trunk lines of railroads as is this city. No less than three of the most important systems of the country pass through its borders, while another is so convenient of access as to be practically within the city. The Chicago & Alton, the first road to reach the city, passes through the heart of the city, while the C. B. & Q and C. C. C. & St. L. pass through what is now East Alton, a short distance to the east of the city, and are reached by local plug trains which connect with all trains on these roads, and offices, freight and passenger, are maintained here by both. The splendid bridges built over the Mississippi here and over the Missouri at Bellefontaine Bluffs have opened the way for the passage of the trains of the C. B. & Q. into and out of St. Louis through the city of Alton. They also give us direct connection with the Wabash and M. K. & T. for the West, North and South. Offices are also maintained in the city by the M. K. & T. road, which crosses the Bellefontaine bridge and runs into St. Louis over the C. B. & Q. tracks. The St. Louis, Chicago and St. Paul, extending from St. Louis to Springfield, is rapidly becoming a line of importance and has a large carrying trade through its territory, both of passengers and freight, its recent extensions both to Springfield and St. Louis adding largely to its business. A belt road connecting us with East St. Louis and

H. A. HOFFMAN, STOVES AND HARDWARE, 100--102 East Second Street.

numerous outlying towns in this State is projected and will undoubtedly be built.

River Transportation.

Besides numerous lines of tow-boats, we have touching at our wharves a number of lines of fine freight and passenger steamers, including the Diamond Jo Line for St. Paul, the Eagle Packet Co. for Alton and Illinois river points, and the Clarksville Packet Co.

Street Improvements.

The growth and prosperity of the city during the past decade has been such as to require the assumption of a more metropolitan aspect, and accordingly, after many futile attempts and much against the will and, in fact, against the active opposition and despite obstructive measures adopted by a number of the property holders, a system of street improvement was begun in the year 1891 which has added not a little to the good appearance of the city and to the comfort of its people, as well as to the facilities for transacting business. In the year referred to contracts were let for a number of blocks of paving in the business portion of the city, and to the work then executed has been added from time to time till with the work now under contract the aggregate of paved thoroughfares in the city will amount to about forty blocks, in the improvement of which more than $200,000 have been expended.

The material adopted, vitrified brick, has proven eminently satisfactory, where a good quality of brick has been used, which, unfortunately, has not been done in all cases.

Industries.

Overshadowing all other industries in Alton is the plant and business of the Illlnois Glass Co., employing as they do, in all departments, from 1,500 to 2,000 persons, of all ages and both sexes, and disbursing a weekly wage running high into thousands. The plant consists of ten large factories, and is one of the largest hollow-ware plants in the world. While by no means Alton's only industry, it is her just pride. This plant occupies a large area on the river front at the east end of the city. The immense consumption of coal, lime, sand and other glass materials by this concern creates, when added to its shipments of manufactured ware daily, a railroad business of no mean proportions.

An office and large warerooms are maintained by the company in St. Louis as well as in Alton.

Connected closely and allied with the Illinois Glass Co. is the Illinois Box Co., doing a large and profitable business and employing many hands.

Hapgood Plow Co.

Another industry of large proportions is the Hapgood Plow Company, manufacturers of farm implements, extending from Langdon to Henry on Front street, and occupying more than half of this very large block. Their complement of hands is something over two hundred.

Equitable Powder Co.

This company, whose factories are located east of the city, has numerous buildings distributed over a territory of 60 acres, and manufactures high-class explosives on a large scale. They were established not many years ago, but have built up a magnificent trade.

SEIBOLD'S STABLES ARE 503 TO 507 PIASA ST., ALTON.

JOESTING & SON,
CLOTHIERS West Third St., Alton, Ill.

Dorsey Fuel Co., Wholesale and Retail
310 Belle Street. Agts. Lehigh Valley Anthracite.
TELEPHONES 84 AND 21.

Stoneware Pipe Co.

A little north of East Alton is located one of our most substantial concerns, the Stoneware Pipe Co., manufacturers of ware the character of which is sufficiently revealed in the name. Suffice it to say that a visit to their factory will reveal wonders to the uninitiated in the way of its products, large and small.

Alton Brick Co.

The Alton Paving, Building and Fire Brick Co., whose works are located at North Alton, has a capacity of 50,000 brick per day of ten hours. No finer material for the manufacture of paving brick, vitrified, now in so much demand for streets and walks is to be found in the United States than is owned in inexhaustible quantities by this company, and they are prepared to fill large orders for the finest pavers on short notice.

Flouring Mills.

The people of Alton may be pardoned for the pride they feel in our magnificent flouring mills, located on West Second street and extending to Front, with levee and railroad facilities unsurpassed.

The mills of the E. O. Stanard Milling Co., occupying almost a block, with an elevator 200,000 capacity, have a daily capacity of 2,000 barrels of flour, and the Sparks Milling Co. a capacity of 1500 barrels. The Alton Roller Milling Co.'s mills have a capacity of some 200 barrels, so that the combined product when all are running full, amounts to something near 4,000 barrels. As to quality it can compete with the world and commands the highest prices in the markets of the world, into all parts of which it is shipped.

H. C. G. MORITZ, MERCHANT TAILOR.
NO. 112 WEST THIRD STREET, ALTON.

Miscellaneous.

Not to expatiate further, we will briefly mention other industries located here, whose combined product runs into millions annually and which furnish employment to hundreds of people.

Above the city are located large stone quarries doing a large local and shipping business. The Alton Lime and Cement Co. and the Armstrong Lime Kilns furnish lime of the first quality and limited in quantity only by the demands of a very large and increasing trade. The Alton Packing and Refrigerating Co., does a general slaughtering and packing business, and its meats and other products have a growing demand in the territory into which it has introduced them.

Beall Brothers, manufacturers of mining tools, have a reputation commensurate with the civilized world for the manufacture of high grade tools for miners use, and they ship to all countries.

The Piasa Woolen Mills employ quite a large quota of people and have a reputation for goods of superior quality.

The Piasa Foundry and Machine Shops and the Duncan Foundry and Machine Shops manufacture machinery and castings of all kinds on a large scale.

We have three large planing mills, which are worked continually to their utmost capacity. They are those of M. H. Boals, Fischer & Winter and Wheelock & Ginter.

Engaged in the manufacture of ice for the trade are Luer Brothers and the Alton Packing and Refrigerating Co.

Across the river from the city are located immense ice houses for storing natural ice, the property of the Huse-Loomis Ice Co., which in favorable seasons, as the winter of 1894 5, spends many thousands of dollars in cutting and storing nature's most beneficent luxury.

Newspapers, Etc.

Four daily and four weekly newspapers are issued in Alton. The daily and weekly *Telegraph*, and the daily and weekly *Republican*, Republican in politics, the daily and weekly *Sentinel-Democrat*, Democratic, the daily *Advance*, independent, and the *Alton Banner*, weekly, (German), Republican in politics.

Educational Institutions.

Aside from its Public School System, which is not excelled anywhere in the State, either in character of schools or buildings, we have in our midst no less than three institutions of learning whose fame has gone to every State in the Union, and whose pupils hail from the remotest corners of our domain. Monticello Seminary, essentially an Alton institution though located at Godfrey, a few miles north of the city, is a magnificent school for young ladies, one of the oldest in the country and numbers among its alumnæ some of the most noted women of the country. Shurtleff College of Upper Alton is one of the oldest institutions of the west and ranks high among the schools of the country, and the names of many of its students have been enrolled in the scroll of fame. The now famous Western Military Academy, also of Upper Alton, is the culmination of the dream of Prof. Wyman, of St. Louis, the founder of Wyman Institute, and under the efficient management of the present proprietor, Col. Willis Brown, has made rapid strides, being a military post of the State and having detailed a regular army officer for instruction in tactics.

Ursuline Academy, a Roman Catholic Institution conducted by the Sisters of Ursula, is an institution that is largely patronized and sends forth many accomplished grad-

REAL ESTATE AGENTS,
307 Belle St.
DAVIS & STAMPER,

uates. There are besides these numerous parochial and denominational schools, so that in the Bluff City there are not wanting facilities for education of every kind and grade.

Public Library.

The "Jennie D. Hayner Memorial Library Association" owns and manages a circulating library of large proportions, 12,000 to 15,000 volumes, located in a handsome and commodious building at the northeast corner of Fourth and State streets, a magnificent gift from Mr. John E. Hayner, President of the Alton Savings Bank, whose deceased wife, Mrs. Jennie D. Hayner, was one of the founders of the institution.

Natural Resources.

Nature's bounteous hand never more generously distributed her gifts than she has done in and about the city of Alton, as the varied factories, lime, vitrified brick, glass and sewer pipe abundantly testify. But they do not tell the whole tale. The variety of stone, soils and clays vouchsafes success to factories producing anything that is made from the earth or its constituent parts.

Healthfulness.

Notwithstanding the fact that we are located on the Mississippi river, with broad, flat bottoms opposite our shores, and to the east and southward, we are justified in saying there is no healthier point in the State of Illinois than the city of Alton. Its natural drainage is such as to render it free from much of the evil that usually pertains to large and thickly populated communities. Its death rate is extremely low, and will compare favorably with any section of the country.

ALTON DAILY REPUBLICAN, Eight pages, cut, folded, and pasted. No "inside" pages, 10¢ per week.

—FOR HEARSES AND CARRIAGES—
Go to YOUNG'S LIVERY STABLE, 310 STATE STREET.

Electric Street Railways.

With a brief reference to our street car system we will conclude this article. Two years ago it was thought that within a few weeks we should have in operation a fine system of electric street cars. But "the best laid plans of mice and men gang aft aglee," and so it happened that the financial stress through which the country has been passing prevented the consummation of the plans then laid. Within the past few weeks, however, we have had the full realization of our hopes in that regard and are now riding in electric instead of horse cars and have good reason to believe there will be important extensions of our system in the near future.

alarm, for 15 minutes after first alarm is sounded, or until they are notified their services are not needed.

2. Henry street being the dividing line, Nos. 2 and 3 shall respond to all alarms east of said street; Nos. 1 and 2 shall respond to all alarms west of Henry street.

3. Any of the above hose trucks arriving at the fire first in their respective districts, and finding the help of the reserve company is needed, they shall proceed to the nearest fire alarm station and ring on the second alarm.

4. The Chief of the Fire Department shall divide the city into three districts, and shall see that each foreman tries the fire plugs in their respective districts at least every 30 days. This order is imperative, and the Chief is held responsible for compliance with above order.

5. Teams shall not be run either up or down hill. The foreman of each truck must see that this rule is strictly obeyed.

6. Horses must be drilled three times a day—9 a. m., 12 m. and 9 p. m.

7. Drivers must have horses and harness cleaned and all work done by 8 a. m. This rule must be strictly adhered to.

8. All brass work must be polished three times each week—Tuesdays, Thursdays and Saturdays, and as much oftener as needed.

9. Horses must be exercised three times each week, either under harness or saddle.

10. Profane or indecent language and all loafing is strictly prohibited in all the hose houses.

11. Members of the Fire Department striking the horses over the head, kicking them or otherwise mistreating

them in a brutal manner, will be removed.

12. The City of Alton expects all the firemen to be neat and tidy, and to wear a suitable uniform while on duty, also to be gentlemanly and treat all guests in a courteous and polite manner, but under no circumstances to allow the Department to be a loafing place for anyone.

HOW TO SEND IN A FIRE ALARM.

In case of a fire in your immediate vicinity you will proceed to the nearest fire alarm box, insert the key and unlock the box; in so doing the alarm is at once sent to each hose house. Do not try to release your key, as it cannot be taken out until the fire department arrives. Each fireman carries a check key with which he will release your key. This is done to prevent false alarms. Each key is numbered and charged to the party holding the same.

Alton Street Directory.

The streets of the City of Alton are numbered on the Philadelphia plan (i. e. every block begins a new hundred), and in such a manner that the even numbers on all streets running east and west are on the north side of the street, and on all streets running north and south on the west side of the street, where not otherwise mentioned. To find the location of a certain number, refer to the street in question and follow the column of figures under the street name until the number wanted is reached. It will be readily seen that the number is located between the corresponding and following streets, as, for instance: To find between what streets 711 E. Second street is located, refer to E. Second street, follow the column of figures until 701 is reached, and it is found that 711 E. Second streets is located between Ridge and Spring streets.

ALBY, from the river to the city limits, first east of Market. Numbers correspond with those on Market.

THE Stoneware Pipe Company
MANUFACTURERS OF

SALT-GLAZED & VITRIFIED
ALTON JUNCTION ILL.

Our List Prices for Sewer Pipe are only about ONE-HALF those of other manufacturers of the same class of goods, and we still make a liberal discount from these prices, varying from 20 to 50 per cent. according to size of pipe—the larger discount being on the smaller sizes.

We also make a specialty of LARGE STONEWARE DRAIN TILE of superior quality, the same, in fact, as first-class Sewer Pipe, the only difference being in the socket, which the sewer pipes have and the drain tile do not have.

Send for Catalogue Containing Price List and Much Useful Information.

We have lately added to our list several new sizes, including 30 inch pipe, which, so far as we know, is six inches larger in calibre and more than 50 per cent. larger in capacity than is manufactured for the trade by any other concern in the United States.

When sizes and quantities wanted are specified, prices will be quoted on same, delivered at any station accessible by river or rail, if so desired, all Freight and Breakage to be charged back to us.

We do not ask our customers to depend upon windy talk or cheap testimonials for information relative to the actual value and quality of our goods, but let the goods speak for themselves, and guarantee every shipment to be satisfactory on arrival at destination or no pay.

We want no man's money without giving a fair equivalent for it, believing this to be the only equitable basis of trade, and the foregoing guarantee places the enforcement of these conditions entirely in the hands of our customers.

Yours Respectfully,

THE STONEWARE PIPE CO.,
ALTON JUNCTION, ILL.
